

Sit down, wake up,  
workout.

This active office chair never stays still. It supports the human body's natural need for movement while sitting. It strengthens the back and promotes an upright posture. Your mind will feel stimulated and your body will feel alert and relaxed.

So with the Aeris Swopper, there's no more need for broken New Year's resolutions. Now you can get healthier and more active just by sitting down.

 aeris

## Give your back pleasure, not pain.

The up and down movement of the chair is similar to the natural movement when walking or running. This way your intervertebral discs are kept nourished and fit. The result, your back can support itself using natural muscle strength – no backrest needed. And instead of tension you'll feel a sense of physical ease.

## Workout instead of burnout – without sweating.

If your body can move freely, you can breathe more deeply. This stimulates circulation and metabolism. You'll feel fitter and more alert and burn more calories.

## No more hunched back at your desk.

The chair's pivotal joint, which is close to the ground, and the spring ensure that with every movement your whole body will move. Even if you lean forward – to read a brochure on the benefits of the AERIS Swopper for example – your back will stay straight without any extra effort on your part.

The AERIS Swopper is as easy on the eye as it is on the back. Choose from over 50 colours, fabrics and designs. Select regular padding or an extra soft seat. Add castors or gliders or even a backrest, if you wish.

Each chair is handmade in Germany with dedicated care and precision.

It was about time to reinvent the way we work and live.  
So that's just what we did.

The issue: We sit too much and don't move enough.  
This is detrimental to our health. The lack of activity  
robs us of our concentration, energy and creativity,  
even after a short amount of time.

The solution: Aeris is driven by the goal of keeping  
our bodies in constant movement. Our products and  
concepts contribute to an active and healthy lifestyle.  
They enable movement in precisely the areas where  
it's least expected, but where it's needed the most  
– when sitting.

We are your secret ingredient for a more active,  
healthier and subsequently happier life.
